Course Description

GIA Diamond Grading Lab October 19– 23, 2015

Diamond Grading Lab –

Through our unique combination of hands-on training, one-on-one coaching, and multimedia, GIA's Diamond Grading lab session explores how to grade diamonds consistently and accurately using a modern gem microscope and a jeweler's loupe. Participants study GIA's International Diamond Grading System, explore time-saving shortcuts to determine a variety of grading factors, and are introduced to methods for reading a GIA Diamond Grading Report. You will spend more than 16 hours practicing grading techniques on diamonds that were carefully selected and graded by GIA. In the process, you will study how to recognize the most common diamond features. Participants must pass a two-stone practical exam to complete the class successfully.
